DETAILED ACTION

1. Claims 1-11 are pending in this application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. In claim 1 (page 49, line 10), the term "thio" is a generic one, indicating the presence of sulfur in some form. As a substituent, it has no one single generally accepted meaning. There could be intended thioxo (=S) or mercapto (-SH). It can also denote replacement by S of some other atom (normally, oxygen or carbon) as in "thioalkoxy", where O is replaced by S. Perhaps some term which began with "thio", like thiophene was intended. Whatever choice is selected must be supported by the specification.

b. In claim 1 or elsewhere in the claims, the definition of alkyl as "or cyclic saturated hydrocarbon radical having from 3 to 6 carbon atoms.." is not clear. In HACKH'S CHEMICAL DICTIONARY, alkyl (C_nH_{2n+1}) is defined as "A monovalent radical derived from an aliphatic hydrocarbon by removal of 1H; as methyl, ethyl, propyl, etc". The definition of alkyl in applicant's own specification and in the claims is contrary

Art Unit: 1624

to the ordinary meaning of alkyl. Applicants are using alkyl to include cycloalkyl such as cyclohexyl or cycloheptyl. Applicant can be their own lexicographer, but they can't use terms that are already known in the art to have certain meaning.

c. In claim 8, the phrase "for use as a medicine" is a mental step since it does not recite steps. The claim language starts as a compound claim, but ends up as a method of use language. Do applicants intend a method of use claim? If so, the claim should be written in a method of use claim language. If not, claim 8 is a duplicate of claim 1.

d. Multiply dependent claims 5-6 and 9-10 are rejected because they depend from another claim/s that is/are multiply dependent. For example, multiply dependent claim 10 depends from claim 9 that is already multiply dependent on anyone of claims 1-6.

e. Claim 10 provides for the use of a compound, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Art Unit: 1624

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 10 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
